PROFESSIONAL SUMMARY

Highly articulate Software Engineer combining robust technical expertise in AI, cloud, and full-stack development with exceptional communication skills. Proven ability to architect scalable systems, confidently lead client-facing technical discussions, and deliver high-impact engineering solutions.

TECHNICAL SKILLS

Languages & Frameworks: C#, Python, C++, Rust, JavaScript, TypeScript, SQL, HTML, CSS, React, .NET, Node.js
Databases & Cloud: PostgreSQL, MongoDB, Snowflake, Microsoft Azure, Databricks, Microsoft Fabric
AI & Data: LLMs, RAG, Agentic AI, Vector Embeddings, Document Intelligence, OCR
Development & DevOps: Next.js, Express.js, REST APIs, Modern APIs, Git, GitHub, NPM, Pip, Docker, Terraform, Azure DevOps, CI/CD, Distributed Systems
Coursework: Database Management Systems, Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, Computer Networks, Cybersecurity, Full-Stack Web Development, DevOps, System Design, UI/UX Principles

EXPERIENCE

- | | |
|--|---|
| Associate Software Engineer
<i>MAQ Software</i> | Nov 2025 – Present
<i>Hyderabad, India</i> |
| <ul style="list-style-type: none">– Spearheaded client architecture workshops to architect a Python-based agentic web platform, integrating multiple LLM frameworks for autonomous decision-making and robust RAG data pipelines, cutting solution delivery time by 40%.– Took ownership of a plug-and-play Document Intelligence Engine, processing millions of records at 98% accuracy for classification, extraction, and confidence scoring across comprehensive validation tests.– Streamlined deployments via Terraform and Azure DevOps to Azure Container Services, tuning prompt execution to process 25-page documents in under 2 minutes while cutting memory usage by 70% under peak loads.– Worked on data migrations of 50+ enterprise repositories from SharePoint to Snowflake with zero production downtime, and constructed custom Microsoft Fabric data agents that cut migration turnaround by 45% while enabling enterprise-wide RAG integrations. | |
| Freelance AI Web Developer
<i>Self-Employed</i> | Sep 2024 – Aug 2025
<i>Remote</i> |
| <ul style="list-style-type: none">– Created and shipped multiple AI-integrated web applications for diverse clients using React and Python, delivering scalable architectures across 5+ project engagements.– Built and integrated RESTful APIs, ML/LLM capabilities, and workflow orchestration pipelines, improving customer-facing workflow coverage by 85% across client projects.– Streamlined testing, validation, and repetitive development workflows through custom tooling, cutting manual QA effort by 60% and shortening project turnaround by 25% across engagements. | |

PROJECTS

- | | |
|--|---------------------|
| OneJob AI Portal [link] | Jul 2026 – Sep 2026 |
| <ul style="list-style-type: none">– Architected an AI-driven job portal with resume-based job filtering, intelligent matching, and a 1-click automated application flow using Python and React.– Delivered AI workflows for resume enhancement, job-specific question generation, and personalized interview preparation, backed by MongoDB and REST APIs, cutting candidate prep time by 50%.– Tech Stack: Python, React, MongoDB, REST APIs, LLMs, System Design | |
| Contextual Query Engine (RAG) [link] | Jun 2026 – Jul 2026 |
| <ul style="list-style-type: none">– Designed a contextual Retrieval-Augmented Generation (RAG) engine for semantic querying over embedded data using PostgreSQL and pgvector, achieving 92% retrieval relevance on benchmark query sets.– Streamlined embedding storage and vector indexing, improving retrieval efficiency and reducing query latency by 40% across large-scale datasets.– Tech Stack: Python, PostgreSQL (pgvector), Vector Embeddings, LLMs | |
| AI Safety Incident Log API [link] | Apr 2025 – May 2025 |
| <ul style="list-style-type: none">– Built a highly concurrent REST API in Rust capable of handling 10,000+ requests/minute for securely logging and managing AI safety incidents, using Rocket, Diesel ORM, and SQLite.– Benchmarked the Rust implementation at up to 1,400x faster than Python and 78x faster than Node.js, while containerizing the service with Docker in Kali Linux.– Tech Stack: Rust, Rocket, Diesel, SQLite, Docker, Kali Linux | |

CERTIFICATIONS

- | | |
|---|---------------------|
| Microsoft Credentials: DP-600, DP-700, DP-800, AB-100, AI-103, SC-500 [link] | Dec 2025 – Sep 2026 |
| GitHub: GH-300 (GitHub) | Aug 2026 |
| NPTEL: Cloud Computing [link] | Sep 2024 |

ACHIEVEMENTS

- Competitive Programming:** LeetCode 1800+ Rating, CodeChef 3-Star, active problem solving on Codeforces and other competitive programming platforms.
TryHackMe: Top 5% global rank (Advanced cybersecurity, penetration testing, cryptography)

EDUCATION

- | | |
|--|---|
| Lovely Professional University
<i>Bachelor of Technology in Computer Science and Engineering; CGPA: 7.94</i> | Sep 2022 – Aug 2026
<i>Punjab, India</i> |
|--|---|
